Permanent Link to Avera celebrates 20 years of test and measurement
2021/06/13

Avera celebrated its 20th anniversary Sept. 20 as a test and quality solutions provider. Founded in 1999 by a team of three in Montreal, Quebec, Avera has grown to 400+ employees with 10 offices and more than 300 customers around the world. "I am proud to see what Avera has become," said Adil Lahlou, one of the co-founders of Avera. "We started Avera by understanding our clients' manufacturing challenges and now reflecting on the continuing success we've had, it's a reminder that we are still on the right path, particularly with the growth of Industry 4.0." Avera's growth can also be attributed to business alliances. Company founders Kurt Hensen (T&M Solutions NV) and Darren Lingafeldt (Nexjen Systems) both believed that combining more than 100 years of test and quality experience would only benefit their customers and the industry. "With each company bringing their own expertise to the forefront, different technologies are being exposed to a wider range of clients internationally," the two said in a press release. With proficiency in vision, RF signals, optics, precision assembly, robotics and automation, Avera has developed hundreds of unique solutions to service major industries such as medical technology, automotive and transport, and consumer goods and electronics. Through standalone projects and complete program outsourcing, Avera's global team has demonstrated its capability to support their customers at every step of the product life-cycle, the company said. "What makes Avera outstanding is the willingness to consistently evolve and stay in front of our customers' business needs," said Francois Rainville, president and CEO of Avera. "It's our employees' enthusiasm to understand and tackle customers' evolving requirements that has kept us ahead for the last 20 years and will continue to through the next 20."

dth signal jammer circuit
