Permanent Link to NavIC L5 signals now available on NovAtel OEM7 receivers
2021/06/26

The OEM7 series. (Photo: NovAtel) The NavIC Indian constellation is now supported in NovAtel's latest firmware release for its OEM7 series of GNSS receivers. The 7.05.04 firmware release for OEM7 provides the following benefits: Users can achieve a single point position accuracy of 2.5 m (rms) using NavIC L5 signals (from the Indian Regional Navigation Satellite System) with GPS L1 on the newly available JSN model. Access to the L5 frequencies on the OEM7600 and OEM7720 provides triple-frequency capabilities to unlock the potential of GPS L5, Galileo E5a and AltBOC, Beidou B2a and NavIC L5. A full listing of all changes in this release are included in the "What's New" document included in the firmware download package. Visit this page to download the latest firmware for a specific platform. Visit NovAtel's documentation portal for the OEM7 reference manual.
