Permanent Link to Talen-X releases BroadSim Wavefront simulator, nano
2021/06/13

BroadSim Wavefront Simulator at work. (Image: Talen-X) Talen-X has added the BroadSim Wavefront Simulator to its software-defined platform. The BroadSim Wavefront further extends the capabilities achieved by BroadSim Anechoic, incorporating support for controlled radiation pattern antenna (CRPA) and multi-element receiver testing. BroadSim, powered by Skydel SDX, has brought new innovations to the forefront each year to meet the growing needs of Talen-X's customers, and the new wavefront simulator is the latest advancement. Its features include: Phase-coherent simulation Real-time automated phase calibration Scalable from 4 to 16 elements Advanced jamming and spoofing scenarios. Talen-X engineers are approaching delivery of an operational demonstration unit, as well. BroadSense Nano The BroadSense Nano GPS jamming sensor is the newest addition to Talen-X's BroadSense product line. It has the smallest size, weight and power of any BroadSense product. The video below features shows a prototype of the Nano, as well as information about its features and a demonstration of the unit reacting to various jamming waveforms in real time.

what are signal jammers
